Dear Hiring Manager,

I am writing in response to the opening Junior Quality Assurance Analyst posted on the UofT career/jobs board.

I have just over four years of experience as a CS student at UTSC in which I have gained valuable experience with designing, testing, and building on large software systems. This experience coupled with experience gained from taking on personal and group projects (see my github for some of the public sample code) with other members of the UTSC community have given me strong problem-solving, communication, software design, and code-breaking skills that I think will make me an ideal candidate for this role.

I've attached my resume for your review and would love the chance to speak with you about this opportunity.

Best,

A handwritten signature in blue ink that reads "Daniel Persaud". The script is cursive and fluid, with the first letter 'D' being particularly large and stylized.

Daniel Persaud
